Circulating ncRNAs as Biomarkers in Health and Disease

Message from the Guest Editor

In the last three decades, crucial progress has been achieved regarding our understanding of the roles of intracellular and extracellular noncoding RNAs (ncRNAs). Intracellularly, ncRNAs seem to be necessary regulators of gene expression affecting and modulating the course of diseases. From tissues to extracellular fluid, ncRNAs are actively pumped to act as messengers involved in intercellular communication, or can be passively released, both of which can serve us in clinical practice to better understand, diagnose or estimate the further progression of diseases in our patients. Firstly, many small ncRNAs have been identified as potential biomarkers of various diseases, following the recent categorization of long ncRNAs. With the recent COVID-19 pandemic, many laboratories throughout the world obtained novel laboratory equipment, allowing them to determine DNA and RNA molecules from samples; thus, I believe an era of novel ncRNA-based biomarkers potentially able to achieve use in daily clinical practice is now ahead of us, and this Special Issue aims to collect both original and review papers focusing on the roles of circulating ncRNAs in health and disease.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
