Risk Prediction Tools and Biomarkers in Gynaecological Cancer

Message from the Guest Editors

Discoveries of new molecular biomarkers are changing the approach to management of women with gynaecological cancer today. With the implementation of precision medicine, management can be focused, precise, and based on the tumour biology potential. This allows for better implementation of novel treatment possibilities, such as immune checkpoint inhibitors, antiangiogenic agents or PI3K/mTOR inhibitors. It is vital to provide the most effective guided therapy to women with high-risk tumours. On the other hand, it is also crucial to consider the quality of life and identify women that would benefit from more conservative management approaches, less radical surgery, and suffer fewer complications related to the applied treatment. We welcome submissions that cover any relevant topic in the areas of improving the current risk prediction models or new biomarkers that can be used to predict the risk or guide management in women with gynaecological cancer.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
