

## Special Issue

# Yeast Models for Gene Regulation

### Message from the Guest Editors

Gene transcription, an initial step of gene regulation, is thus affected by chromatin configuration through the accessibility of transcription factors. The selection of transcription factor binding sites is further regulated through other layers of chromosome geometry, including 3D genome architecture. In addition, the transcribed mRNA is targeted for the next phases of gene regulation. A variety of RNA-binding proteins are recruited to the newly synthesized mRNA and modulate their expression level via processing, export and decay rate regulation. mRNA–protein complexes (mRNPs) are dynamically remodeled for establishing the cytoplasmic regulations (localization, translation and degradation). The final output of gene expression level is strictly regulated by the interconnection of these regulations. Yeast models with powerful genetics and biotechnologies have contributed to our understanding of these complicated biological processes for decades. This Special Issue is focused on all phases of yeast gene regulation and collects research articles and reviews for recent findings in gene regulation.

### Guest Editors

Prof. Dr. Kouji Hirota

Department of Chemistry, Graduate School of Science, Tokyo Metropolitan University, Minamiosawa 1-1, Hachioji-shi, Tokyo 192-0397, Japan

Dr. Ryuta Asada

Department of Viticulture & Enology, University of California, Davis, CA 95616, USA

### Deadline for manuscript submissions

closed (15 October 2023)

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
