

Special Issue

Necrotic Cell Death Mechanisms and Therapies

Message from the Guest Editors

This Special Issue aims to delve into the intricate world of necrotic cell death, exploring its underlying mechanisms and potential therapeutic interventions. Understanding the intricacies of necrotic cell death mechanisms is imperative for advancing our knowledge of cell biology and developing targeted therapeutic strategies. This Special Issue intends to bring together cutting-edge research and insights from experts in the field, fostering a comprehensive understanding of necrotic cell death pathways. The importance of this Special Issue lies in its potential to unravel novel therapeutic approaches in order to mitigate pathological conditions associated with necrotic cell death. Additionally, we seek to develop innovative therapies to treat a long line of life-threatening diseases and prolong life.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
