

## Special Issue

# State-of-the-Art Protein X-Ray Crystallography

### Message from the Guest Editors

X-ray crystallography stands as the main technique for detailed protein structural determination. A bottleneck of this procedure is the construction of a protein density map from X-ray diffraction data, the so-called phase problem. A promising avenue to overcome these challenges involves the application of iterative projection algorithms and deep learning methods to direct phasing. This has led to a significant breakthrough in the last decade. Trial calculations utilizing hybrid input-output and difference-map iterative algorithms have demonstrated the feasibility of obtaining high-resolution structures starting from a random electron density. This implies that *ab initio* phasing, devoid of any model bias, is attainable for a notable fraction of protein crystals. This Special Issue aims to present an overview of the progress made in the field of direct phasing for protein crystals. Contributions from researchers will explore new ground. Through the exchange of ideas, it is hoped that this Special Issue will promote general knowledge and stimulate further growth of this new and important area of research in protein crystallography.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
