Cutting-Edge Research on the Analysis of Small Biomolecules in Foods, Plants, and Biological Samples, 2nd Edition

Message from the Guest Editors

Following a very successful first run, we are pleased to announce the launch of the second edition of a Special Issue on 'Cutting-Edge Research on the Analysis of Small Biomolecules in Foods, Plants, and Biological Samples'.

The aim of the present Special Issue is to compile review articles and original research articles covering recent advances in the analysis of small bioactive molecules (primary and secondary metabolites) in foods, plants, and biological samples.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.
