Key Molecules Regulating Plant Response to Abiotic Stress: Transcription Factors and Stress-Induced Proteins

Message from the Guest Editor

This Special Issue, titled "Key Molecules Regulating Plant Response to Abiotic Stress: Transcription Factors and Stress-Induced Proteins" invites authors to submit innovative reviews or original research articles that conduct the identification of key molecules regulating plant response to abiotic stress using transcriptomics and other omics methods, as well as bioinformatics tools such as gene duplication and phylogenetic analysis, and the functional characterization of these protein molecules in plant response to various environmental stresses using genetic approaches.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
