Molecular Biomarkers In Cardiology 2021

Message from the Guest Editors

Cardiovascular diseases still represent the leading cause of death worldwide. The need to prevent the acute onset of such diseases and predict their occurrence is the major goal of medicine. By succeeding in preventing the negative consequences of cardiovascular diseases, physicians can prevent both the mortality and morbidity of the patients. Therefore, the improvement in the quality of life and the reduction in the financial burden of health due to the reduced impact of chronic comorbidities related to cardiovascular diseases will also improve the economics of the nations. Biomolecular approaches for the early identification of cardiovascular diseases before their onset are an attractive field in cardiology. There is little evidence regarding a perfect biomarker able to identify the unstable atherosclerotic plaque, the occurrence of aortic dissection, or the incipient onset of heart failure. The aim of this Special Issue is to offer the readers the best overview of the current state of knowledge of biomolecular biomarkers in cardiovascular diseases. Prof.

Guest Editors

Dr. Pietro Scicchitano

Cardiology Section, Hospital "F. Perinei" Altamura (BA), 70022 Altamura, Italy

Dr. Matteo Cameli

Department of Medical Biotechnologies, Division of Cardiology, University of Siena, 53100 Siena, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
