

## Special Issue

# State-of-the-Art Molecular Mechanism of Antimicrobial Resistance in Italy 2020-2021

### Message from the Guest Editor

This Special Issue aims to provide a comprehensive overview of the state-of-the-art of the molecular mechanisms of antimicrobial resistance. We invite research papers that consolidate our understanding in this area, and full research articles and systematic reviews will be published. Potential topics include, but are not limited to, the following research areas:

- New technologies for antimicrobial resistance detection;
- Molecular detection of antimicrobial resistance;
- Genetics of antimicrobial resistance;
- Prevention of antimicrobial resistance;
- Mechanisms of resistance of the main classes of antimicrobials.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.
