Molecular Effects of Environmental Pollutants on Health of Human, Animals and Plants

Message from the Guest Editor

Environmental pollutants are hazardous to organisms' health and ecosystems. Massive global contamination by pesticides, heavy metals, pharmaceuticals, microplastics, and biotoxins in the atmosphere, water, and soil is produced primarily by industrial, wastewater, and domestic effluents. Some of these pollutants have become ubiquitous and can interfere with fundamental physiological processes in Human, Animals, and Plants, producing health impairment of these organisms. Few laboratory studies have demonstrated a causal relationship between environmental pollutants and health alterations in animal, plant, and human, reproductive health included. We cordially invite authors to contribute to this Special Issue with original research articles and reviews on how different types of environmental pollutants induce adverse effects on the Health of Human, Animals, and Plants. Molecular mechanisms of pollutants action for sperm nuclear basic proteins and nucleic acids and epigenetic modifications are also within the scope of this Special Issue.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
