Advances in Parkinson's Disease Drugs

Message from the Guest Editors

Parkinson's disease (PD) continues to be one of the major diseases worldwide involving the Central Nervous System. Dopaminergic, cholinergic and other neuronal alterations are observed in PD patients and play a key role in the cascade of neurodegenerative events.

Despite this disorder has been extensively investigated over the time, the pharmacological treatment of PD is only symptomatic since there are no treatments to stop or slow the disease. Fortunately, in recent years, the scientific scenery has opened up to new and captivating perspectives for the future of PD treatment. This Special Issue aims to highlight the latest findings and innovative therapeutic strategies as potential approaches useful to implement the scientific heritage on this field. For this purpose, we are encouraging researchers to present their valuable work as scientific contribution or review articles. We will really appreciate your works and it will be a pleasure for us to receive your manuscripts.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
