

## Special Issue

# Prions and Prion-Like Mechanisms in Disease and Biological Function

### Message from the Guest Editors

Research into prions has vastly expanded our knowledge and understanding of an infectious pathogen. Prions are replication-competent assemblies of a host-encoded protein. Recent data suggest that prion transmission can be dissociated from toxicity, raising the question of why some prion and prion-like amyloid aggregates are toxic while others are not, and how self-replication, infectivity, and toxicity are linked at the structural and mechanistic level. These key questions of fundamental importance will be highlighted in this Special Issue. They are by their nature multidisciplinary, and we thus strongly welcome approaches that merge structural, cellular, and molecular biology, biochemistry, biophysics, imaging and computational techniques on topics including, but not limited to the following: Structural properties of prions and amyloid Prion-like mechanisms in neurodegenerative disease, in systemic diseases, and in biological functions Structure-toxicity and structure-infectivity relationships Structural and dynamic basis of prion strains Functional role of disease-associated mutations

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
