

Special Issue

Prostate Cancer: From Models to Molecular Mechanisms and Precision Medicine

Message from the Guest Editor

Prostate cancer is a leading cause of cancer-related deaths in men, and increasing our understanding of the complex molecular mechanisms that contribute to prostate cancer promises to have a beneficial, global impact on our management of patients with prostate cancer. This special issue aims to further understand the molecular mechanisms underpinning prostate cancer in relation to disease stage/subtypes, and highlight how advances in models of prostate cancer can build our understanding of prostate cancer biology and aid precision medicine. We are pleased to invite you to submit a review article or original research articles in the field of prostate cancer. Suggested themes include exploring new insights into modelling this disease, improving our understanding of the underlying molecular mechanisms, identification of genetic drivers, actionable targets and/or biomarkers, and translational approaches of clinical relevance, including precision medicine. I look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
