

## Special Issue

# Protein Phosphorylation in Cancer: Unraveling the Signaling Pathways

### Message from the Guest Editor

The discovery of protein kinase key roles in cancer formation and progression has triggered great interest and stimulated intense research to develop pharmacological kinase inhibitors and therapeutic antibodies. These represent important steps in the development of targeted treatments, but also in the identification of prognostic and predictive biomarkers. Although the majority of efforts have been focused on tyrosine kinase inhibitors (TKI) and tyrosine kinase receptor (RTK)-targeting antibodies, renewed efforts and interests are being directed towards serine/threonine kinases and protein phosphatases. With this open-access Special Issue on “Protein Phosphorylation in Cancer: Unraveling the Signaling Pathways”, we would like to provide an overview of the recent advances and cutting-edge approaches that allow better studying and understanding kinase/phosphatase signaling in tumor formation, progression, and drug resistance. Both original research articles and comprehensive reviews pertaining to a relevant topic within this vast and complex field are welcome.

### Guest Editor

Dr. Peter Coopman

Institut de Recherche en Cancérologie de Montpellier/ INSERM U1194, CNRS, ICM, Univ. Montpellier, France

### Deadline for manuscript submissions

closed (15 May 2021)

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

---

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
