

## Special Issue

# Pluripotent Stem Cells: From Basic Research to Therapeutic Applications

### Message from the Guest Editors

Pluripotent stem cells (PSCs) are remarkable cells that can differentiate into any cell of the embryonic lineage, and depending on their state of pluripotency and species, they can also generate extraembryonic cell types. PSCs can be derived from early-stage embryos as embryonic stem cells (ESCs) or from adult somatic cells through reprogramming, creating induced pluripotent stem cells (iPSCs). These cells have revolutionized medical research and clinical applications due to their unique potential for therapy and regenerative medicine. This Special Issue aims to explore the recent advances in PSC research, covering the molecular mechanisms of pluripotency, genetic modification, tissue engineering, disease modeling, drug discovery, and early-stage clinical trials.

### Guest Editors

Prof. Dr. Claudia Spits

Research Group Reproduction and Genetics, Vrije Universiteit Brussel, Brussels, Belgium

Dr. Diana Al Delbany

Research Group Reproduction and Genetics, Vrije Universiteit Brussel, Brussels, Belgium

### Deadline for manuscript submissions

31 January 2026

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

---

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
