

Topical Collection

Recent Advances in Cancer Immunotherapy

Message from the Collection Editor

In this Special Issue, we aim to publish recent advances in cancer immunotherapy from various perspectives, including basic research, translational data, clinical observations, and clinical trials, as well as comprehensive reviews that focus on cancer immunotherapy in malignancies such as melanoma, lung cancer, urothelial cancer, renal cell carcinoma, head and neck squamous cell carcinoma, and hematological malignancies. This Special Issue will cover all aspects of recent advances in cancer immunotherapies, including ICIs and CAR T cell therapies, in hematological and solid malignancies. This Special Issue will include review articles (especially with respect to biomarkers for immunotherapies, resistance mechanisms to immunotherapies, or novel immune-related targets), original research articles in this field, and short contributions. This Special Issue will also accept case series if the treatment course of the patient is educational or the detailed molecular analysis was performed to investigate resistance mechanisms to cancer immunotherapy.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
