

Special Issue

Recombinant Enzymes/Proteins in Biotechnology

Message from the Guest Editors

The production of recombinant enzymes and proteins has been one of the main pillars of modern biotechnology, spreading throughout industries from food and agriculture to modern biopharmaceuticals. Robust design of production host strains and processes ensure sustainability of production in the modern sense and allow generation of high-value, high-impact molecules with decreased environmental impact. This Special Issue is intended to cover broader aspects of proteins production and application in multiple aspects of the industry and life sciences. Potential topics include but are not limited to: - Novel bacterial and/or higher organism production strains; - Application of synthetic biology in strain development and process optimization; - Production of enzymes for industrial application; - Application of enzymes in biotransformation of compounds; We welcome the submission of original manuscripts, short communications, and reviews.

Guest Editors

Dr. Stanislav Stuchlík

Department of Molecular Biology, Faculty of Natural Sciences,
Comenius University in Bratislava, Bratislava, Slovakia

Dr. Zdenko Levarski

Science Park, Comenius University in Bratislava, Slovakia

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
