Pharmacological Approach to Sepsis and Septic Shock

Message from the Guest Editor

Sepsis is a major cause of health loss and mortality worldwide. This systemic illness is caused by a dysregulated host response to infection, which leads to progressive multiple organ dysfunction. Despite its high health-related burden, the pathophysiology of sepsis and multiple organ dysfunction is poorly understood.

This Special Issue intends to present original research articles and up-to-date reviews about the molecular aspects which lead to a better understating of the network of interactions in sepsis, septic shock and multiple organ dysfunction. We look forward to reading your contributions.

Guest Editor

Dr. Alireza Mani

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
