

## Special Issue

# Recent Developments in Mesenchymal Stem Cells

### Message from the Guest Editors

Mesenchymal-stromal-cell-based products are among the cutting-edge biological approaches for regenerative medicine in several fields of medical technology.

Alongside the classical view of clinically expanded cells, mesenchymal stromal cells are now envisioned as crucial biological products acting as the active force in more complex therapeutic agents. Additionally, outmatching the idea of tissue substitution, mesenchymal stromal cells are a reservoir of active factors and extracellular vesicles, collectively referred to as the “secretome”, that stimulate resident progenitor cells to favour tissue regeneration. This Special Issue aims to identify the advances required to address future regenerative-medicine-based approaches relying on mesenchymal stromal cells and their released products. This Special Issue will establish the benchmarks for the state-of-the-art evidence necessary to facilitate the clinical implementation of these innovative therapeutic approaches. Reports presenting basic science, in vitro, in vivo and pre-clinical research may be included to ensure that regenerative medicine technology is able to be seamlessly transferred to the clinic.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

---

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
