

Special Issue

Advances in the Pathology of Prostate Cancer: 2nd Edition

Message from the Guest Editor

Prostate cancer remains one of the most common malignancies among men worldwide, and its complex pathology necessitates continuous exploration and analysis. Deeper insights into the molecular and cellular underpinnings of this disease will help us discover new diagnostic and prognostic markers and identify and validate chemopreventive/therapeutic targets and biomarkers for the evaluation of chemopreventive/therapeutic responses. In this Special Issue, we seek original research articles and reviews on various aspects of prostate cancer's pathology. The topics of interest include, but are not limited to, the molecular basis of prostate cancer, advancements in diagnostic techniques, emerging biomarkers, histopathological correlations with chemopreventive/therapeutic outcomes, and novel therapeutic strategies. We encourage submissions from researchers across the globe. Together, let us advance our understanding of prostate cancer pathology to improve patient care and outcomes. We look forward to receiving your valuable contributions.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
