Biochemistry of Wine and Beer

Message from the Guest Editors

Today, the production of wine and beer is a worldwide industry worth millions of euros annually, with breweries and wineries throughout the globe. The knowledge of the biochemical processes that occur during beer and wine elaboration is large, but new technologies and analytical methodologies may allow to get completely new information. For this reason, we feel that there is a need for a Special Issue collecting and combining the various and latest findings of this field. This Special Issue will provide readers with an attractive opportunity to easily obtain new information concerning the different facets of wine and beer biochemistry. For the authors, it will be an appropriate occasion to give visibility to their results and analyses. This Special Issue will contain contributions discussing all the aspects broadly indicated by the keywords. Review articles by experts in the field will also be welcome.

About the Journal

Message from the Editor-in-Chief

Biomolecules

(<https://www.mdpi.com/journal/biomolecules>) is an international, peer-reviewed, open access journal focusing on biogenic substances, and published online by MDPI. *Biomolecules* is indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, and CAPIus / SciFinder. The Impact Factor (2024) is 4.8, ranking 75/319 (Q1) in “Biochemistry & Molecular Biology”.
