

Special Issue

Biomolecules in Development and Diseases of Urogenital System

Message from the Guest Editors

Basic morphological analyses have a long tradition and continue to give us useful information about different biomolecules, opening the way to understanding the pathways that underlie the normal development of the urogenital system, as well as the associated pathological changes. There is the need to identify new biomolecules in the development and diseases of the urogenital system beyond morphology. Accordingly, similar basic processes and genes may be involved in the development and diseases of the urogenital system. This exciting concept suggests that the underlying key technology along with comparative studies in development and diseases may provide unique insights into the link between normal differentiation and pathology. This Special Issue on biomolecules in the development and diseases of the urogenital system should emphasize the importance of a translational approach, which can transform the discovery of biomolecules in the laboratory into innovative diagnostic tools and therapeutic treatments in the field of the development and diseases of the urogenital system. We look forward to reading your contributions.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
