

## Special Issue

# Molecular and Biological Enigma of Neuroblastoma: How to Solve It?

### Message from the Guest Editor

For the last decades, as science and technology have rapidly advanced, we have learned much about the molecular and genetic mechanisms of neuroblastoma. Nevertheless, several unanswered questions concerning neuroblastoma make it difficult to understand its mechanisms and design better patient cures. We know that the master gene causing neuroblastoma is MYCN. However, the biology and clinical behavior of neuroblastoma are strongly reflected by a lineage-specific developmental program and genetic dysfunction, as well as a tumor microenvironment, the mechanisms of which remain elusive. In this Special Issue, we discuss those problems and how to solve them by focusing on the enigma of neuroblastoma. The title is “Molecular and Biological Enigma of Neuroblastoma: How to Solve It?” Review articles, original research, and comments about the following subjects are welcome. The actual title of the paper can be modified.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
