

## Special Issue

# Effects of Biomolecules on Ice Nucleation

### Message from the Guest Editor

This special issue will concentrate on biomolecules which affect, one way or another, ice nucleation. These molecules may be INPs or AFPs or IBPs or THPs or organics such as PVA. Whether nucleation is enhanced, such as with large proteins from bacteria, or inhibited as with some AFPs, we want to gather together current knowledge and recent experiments and models describing the effects. Please consider submitting your recent work to this issue.

---

### Guest Editor

Prof. Dr. Peter Wilson

School of Environment, Science and Engineering, Southern Cross University, East Lismore, NSW 2480, Australia

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
