

Special Issue

MAPKs in Skin Health and Disease

Message from the Guest Editor

Mitogen-activated protein kinases (MAPKs) are major signaling transduction proteins in human skin, which play key roles in skin protection against injurious damage due to factors such as ultraviolet exposure, chemical and physical contact, various antigens and pathogens, and water loss. Skin is the body's largest organ, and therefore, the events controlling its homeostasis are varied and complicated. Notably, these include the use of MAPKs and related transcription factors. The objective of this Special Issue, "MAPKs in skin health and disease", is to publish a collection of the latest review and research papers regarding the signaling events of MAPKs induced by biomolecules as well as the molecular targets, biological pathways, and mechanisms of action potentially involved in MAPK signaling in various conditions such as skin cancer, aging, inflammation, and dermatitis. Articles reporting strategies on how to control the beneficial activities of biomolecules by MAPKs in human healthy/aged skin will also be considered. I strongly encourage you and/or your colleagues to submit manuscripts that match the objectives and topics of this Special Issue.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
