

Special Issue

Breast Milk-Derived Biomolecules in Human Health

Message from the Guest Editor

The topics of the Special Issue “Breast Milk-Derived Biomolecules in Human Health” include, but are not limited to, studies on the biomolecules of the milk microbiome; the impact of milk biomolecules on the gut–brain–immune axis; obesogens in breast milk; neurotransmitters, hormones, and cytokines in breast milk; extracellular vesicles and cells in breast milk; the impact of maternal health on milk quality; clinical studies dealing with the health impacts of formula-feeding and breastfeeding. Original research articles, technical notes, case reports, short reviews, and commentaries are welcome. As the of this Special Issue, I hope that the collection of articles will be useful references for teaching and research to stimulate discussion and to open up new avenues of research, and will be situated within the existing literature as a reference point.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
