

Special Issue

Molecular Basis of Neuromuscular Diseases

Message from the Guest Editor

Neuromuscular diseases (NMDs) are caused by impairment of the functioning of the muscles, with many different forms that vary in onset, severity, and prognosis. NMDs can be classified into hereditary or acquired disorders with sensory impairment, motor impairment, or both. Muscular impairment, generally manifested as muscle weakness and fatigue, can be linked to motor neuron disease (such as amyotrophic lateral sclerosis), peripheral neuropathy, neuromuscular junction disorders (like myasthenia gravis), and myopathy. These alterations can be determined by pathologies of the muscle or by alterations of the nerves or of the neuro-muscular junctions. Furthermore, NMDs can be also age-related neurodegenerative disorders. The Special Issue will focus on understanding the molecular basis and metabolic alterations underlie neuromuscular pathologies. Original manuscripts and reviews concerning with special attention of pathophysiology of muscular diseases, the prognostic and diagnostic biomarkers of NMDs, or the development of new synthetic or naturally originating molecules for the treatment of neuromuscular pathologies are very welcome.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
