New Approaches for the Discovery of Pharmacologically-Active Natural Compounds

Message from the Guest Editor

Natural products continue to be a major source of active compounds. Natural products from different sources have provided large number of molecules approved for clinical use or that have been used as starting points of optimization programs. Similarly, natural products have inspired the synthesis and development of biologically active molecules. However, identifying pharmacologically active natural products in an efficient and systematic manner is challenging. To this end, a broad range of experimental and computational approaches have evolved in recent years, boosted by the progress on technological advances of screening strategies. In many cases both experimental and theoretical methods are used in synergy. The goal of this Special Issue is to present recent progress on technological advances and applications of different approaches to identify pharmacologically active natural products.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
