

## Special Issue

# Molecular Basis of Neuromuscular Diseases 2.0

### Message from the Guest Editors

Neuromuscular diseases (NMDs) are caused by impaired muscle function, with many different forms that vary in their onset, severity, and prognosis. NMDs can be classified into hereditary or acquired disorders with sensory impairments, motor deficits, or both. Muscle damage generally involves muscle weakness and fatigue, and it can be linked to motor neuron diseases, peripheral neuropathy, neuromuscular junction disorders and myopathy. These alterations can be determined by the pathologies of the muscles or by alterations in the nerves or neuromuscular junctions. Furthermore, NMDs can also cause age-related neurodegenerative disorders. To date, many neuromuscular diseases have no cure and their pathogenesis is not well-known. The Special Issue will focus on molecular foundations and metabolic alterations that underlie neuromuscular pathologies. Original articles and reviews with a particular focus on the pathophysiology of muscular diseases, prognostic and diagnostic biomarkers of NMDs, as well as the use of non-mammalian models (i.e., *Caenorhabditis elegans* and *Drosophila melanogaster*) to investigate neuromuscular pathologies, are very welcome.

### Guest Editors

Dr. Pasquale Scarcia

Department of Biosciences, Biotechnologies and Biopharmaceutics,  
Università degli Studi di Bari, Bari, Italy

Dr. Rosita Curcio

Department of Pharmacy, Health and Nutritional Sciences, University of  
Calabria, 87036 Rende, Italy

### Deadline for manuscript submissions

closed (15 January 2024)

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

---

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
