

Special Issue

Recent Insights in Nucleic Acid and Protein Delivery

Message from the Guest Editor

Nucleic acids and proteins are subjects to natural trafficking into and out of cells and nuclei. The involved systems are highly specialized structures, such as vesicles and microvesicles. The past two decades revealed that under certain conditions, delivery of proteins creates less risk of changing cell genome integrity. Although a variety of carriers for nucleic acids and, to a lower extent, for protein delivery, have been developed since the times of Griffith and Avery, further work in the field is still needed. This Special Issue focuses on the advancement and analysis of different aspects of the systems for nucleic acids and protein delivery that have been achieved and still have to be reached. Both review manuscripts and original research articles are invited to bring the freshest views in this field of biology and experimental medicine.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
