Molecular Pathology, Diagnostics and Therapeutics of Ovarian Cancers

Message from the Guest Editor

Ovarian cancer is one of the most aggressive malignancies threatening women's health worldwide. The first-line treatment for advanced ovarian cancer is debulking surgery followed by neoadjuvant chemotherapy. However, most patients would eventually relapse regardless of initial response to the treatment due to chemoresistance and metastasis. Thus, new treatments are urgently needed. This may have a significant impact on the landscape of ovarian cancer treatment and improve overall patient survival. In this Special Issue, we would like to invite both original research and review articles highlighting recent advances in potential molecular targets, mechanisms of metastasis, chemoresistance and stemness, and immunotherapy therapy (alone or combined with either chemotherapy or targeted therapy) in ovarian cancer.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
