

Special Issue

p53 and Tumor Stroma

Message from the Guest Editors

We are pleased to invite you for participation in the special issue “p53 and tumor stroma” which is being prepared for the journal *Biomolecules*

The aim of this special issue is to elucidate the activities employed by wild-type and mutant p53 in shaping tumor stroma and to highlight the role of these mechanisms for cancer development and therapy response. Original research manuscripts and reviews dealing with these aspects are very welcome.

Keywords:

Tumor microenvironment
solid tumors
response to therapy
p53 secretome
mutant p53
therapy resistance

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
