

Special Issue

Unveiling Protein Functions, Dynamics and Interactions in Health and Disease Using Experimental and Theoretical Approaches

Message from the Guest Editors

The aim of this Special Issue is to bridge the gap sometimes existing among different approaches that are exploited for a common purpose, i.e., understanding and describing different functional-dynamical features of proteins in specific physiological and pathological conditions. A multi-disciplinary collection including molecular biology, structural biology, biophysics, biochemistry, bioinformatics and computational chemistry is the scope of this issue.

In this context, this collection aims at reporting current experimental and computational trends in the field of proteins functions, interactions and dynamics. In this Special Issue, original research articles, Reviews, and Perspectives are welcome. Research areas may include (but not limited to) the following:

- (i) Understanding the structural, dynamical and functional role of point mutations
- (ii) Conformational changes of proteins linked to their function
- (iii) Protein-proteins, protein-nucleic acids and protein-ligand interactions in health and diseases
- (iv) Protein design and engineering for biomedical applications

I look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
