

Special Issue

New Targets and Strategies in Regenerative Medicine

Message from the Guest Editors

“New targets and strategies in regenerative medicine” is an upcoming Special Issue to be published in “*Biomolecules*”. Its goal is to discuss new molecules in regenerative medicine and related experiments that highlight targets for tissue regeneration. We invite you to submit your experimental and clinical findings on tissue repair and regeneration to this Special Issue. The papers should contain novel findings and be written in the format of *Biomolecules*. We propose a submission deadline of 15 October 2019 in order to have the articles published by the end of this year. Please feel free to circulate this announcement to others you feel might be interested.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
