

## Special Issue

# New Insights into Stem Cell Regulation

### Message from the Guest Editor

In recent years, there has been an ever-increasing interest in stem cells and their potential application in regenerative medicine. However, molecular and genetic studies are still necessary to better understand the biology of stem cells and their possible application in clinical protocols. In addition to valuable in vitro studies, significant information can be derived from the use of experimental models that can study and manipulate in vivo endogenous and exogenous molecules that control both stem cell fate and crosstalk with the niche. Among these models, invertebrates endowed with astonishing regenerative capabilities, a feature mostly lost by higher organisms, are of particular interest. This Special Issue will focus on basic stem cell research for better characterization of stem cell maintenance, commitment, and differentiation processes, as well as tissue regeneration.

### Guest Editor

Dr. Alessandra Salvetti

Department of Clinical and Experimental Medicine, Unit of Experimental Biology and Genetics, University of Pisa, Pisa, Italy

### Deadline for manuscript submissions

closed (15 September 2021)

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
