Protein Interactions at the Molecular Scale: From Mechanisms to Applications

Message from the Guest Editor

The importance of hydrophobic interactions in proteins is well known; it goes well beyond protein folding and often dominates evolutionary trends in protein functions. Although the most hydrophobic amino acids are known, the collective effects of hydrophobic interactions on protein binding are seldom quantified, even in molecular dynamics simulations. The aim of this Special Issue is to collate and present experimental and/or theoretical studies of protein–molecule binding that explore the role of protein hydrophobic regions and alternative critical regions.

Guest Editor

Dr. James C. Phillips

Department of Physics and Astronomy, Rutgers University, Piscataway, NJ, USA

Deadline for manuscript submissions

31 January 2026

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Victor Muñoz

Director NSF-CREST Center for Cellular and Biomolecular Machines (CCBM), University of California Merced, 5200 North Lake Road, Merced, CA 95340, USA

Prof. Matthias Buck

Department of Physiology and Biophysics, School of Medicine, Case Western Reserve University, 10900 Euclid Avenue, Cleveland, OH 44106, USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review and reviewer names are published annually in the journal.
