

Special Issue

Protein Disorder

Message from the Guest Editor

The Special Issue, "Protein Disorder", aims to summarize all aspects of current knowledge concerning the role of intrinsically disordered proteins/regions. This Issue will cover a selection of original and review articles regarding recent studies focused on the role of Intrinsically disordered protein (IDP)/Intrinsically disordered region (IDR) in the context of pathophysiology, leading to different kind of disorders. Experimental and theoretical papers, up-to-date review articles, and commentaries are welcome. This Issue will cover a selection of original and review articles regarding recent studies focused on the role of Intrinsically disordered proteins (IDSP)/Intrinsically disordered regions (IDRs) in living organism development, health and all other aspects important for the survival and functioning of the organism.

Guest Editor

Dr. Beata Greb-Markiewicz

Department of Biochemistry, Molecular Biology and Biotechnology,
Faculty of Chemistry, Wrocław University of Science and Technology,
Wybrzeże Wyspiańskiego 27, 50-370 Wrocław, Poland

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Victor Muñoz

Director NSF-CREST Center for Cellular and Biomolecular Machines (CCBM), University of California Merced, 5200 North Lake Road, Merced, CA 95340, USA

Prof. Matthias Buck

Department of Physiology and Biophysics, School of Medicine, Case Western Reserve University, 10900 Euclid Avenue, Cleveland, OH 44106, USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review and reviewer names are published annually in the journal.
