

## Special Issue

# Biophysical Advances in Structure-Based Drug Design

### Message from the Guest Editor

This Special Issue will focus on the development and application of cutting edge biophysical approaches in structure-based drug design. The work can be either experimental or computational: hybrid approaches are especially welcome. Areas of particular interest include, but are not limited to cryo-electron microscopy, artificial intelligence and deep learning, biophysical ligand screening, free energy calculations, new spectroscopic methods, and COVID-19. We welcome research from both industrial and academic groups.

#### Author Benefits

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review and reviewer names are published annually in the journal.
