Biophysical Advances in Structure-Based Drug Design

Message from the Guest Editor

This Special Issue will focus on the development and application of cutting edge biophysical approaches in structure-based drug design. The work can be either experimental or computational: hybrid approaches are especially welcome. Areas of particular interest include, but are not limited to cryo-electron microscopy, artificial intelligence and deep learning, biophysical ligand screening, free energy calculations, new spectroscopic methods, and COVID-19. We welcome research from both industrial and academic groups.

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).

Recognition of reviewers

: APC discount vouchers, optional signed peer review and reviewer names are published annually in the journal.
