Message from the Guest Editors

This Special Issue, entitled "Enzyme-Assisted *Biosensors* for Ultra-Sensitive Diagnosis", aims to provide a comprehensive overview of the current state-of-the-art in this field. The issue will feature articles from leading experts in the field, covering topics such as the design and optimization of enzyme-based *biosensors*, the development of portable and low-cost *biosensor* devices, and the application of these *biosensors* for the diagnosis of various diseases chemical contaminants and biological hazards.

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
