Message from the Guest Editors

Dear Colleagues,

You are kindly invited to submit original research and review articles to this new Special Issue dedicated to the most recent developments in the emerging field of biosensing-drug delivery systems. This Special Issue aims, to showcase the latest trends in biosensing-drug delivery systems, such as in smart and stimuli-responsive materials (hydrogels, electrospun fibers) and in fabrication designs for wearable and implantable bioMEMS and microfabricated devices; novel concepts such as the integration of delivery devices with mobiles for continuous monitoring of drug dose and physiological response in disease conditions (diabetes, epilepsy and pain to name but a few) will also be presented. Topics of interest include, but are not limited to the following:

- Biosensing-drug delivery
- Closed-loop therapies
- Stimuli-responsive materials
- Wearable
- Implantable
- BioMEMS
- Continuous monitoring
