Quantitation in Lateral Flow Immunoassays: Self-Contained Reading to Stand Alone Instruments and Cellphones

Guest Editors:

Prof. Dr. Rodica Elena Ionescu

Laboratory of Light, Nanomaterials and Nanotechnology (L2n), CNRS EMR 7004, University of Technology of Troyes, 12 Rue Marie Curie, CS 42060, CEDEX, 10004 Troyes, France

Prof. Dr. Robert Steven Marks

Department of Biotechnology Engineering, Ben Gurion University of the Negev, Beer-Sheva 8410500, Israel

Deadline for manuscript submissions: closed (31 December 2021)

Message from the Guest Editors

The lateral flow immunoassay (LFIA) method is one of the most successful and versatile strategies in point-of-need applications. The past decades have witnessed a terrific evolution in lateral flow immunoassay technologies, and lateral flow immunoassays are becoming well suited to replace laboratory-based immunoassays in point-of-care testing locations. The Special Issue, titled " Ouantitation in Lateral Flow Immunoassays: Self-Contained Reading to Stand Alone Instruments and Cellphones", regroups the various innovation attempts in order to bring more versatile features (proof-of-value) to conventional lateral flow immunoassays, such as the ability to quantitate; thus, enabling new medical niche markets to be served, including POCT at home. Quantitation can be done by creating system configurations, adapting new instrumentation to provide quantitative data on the signals produced, and finally how cellphones will enable home monitoring and their connection to the cloud/artificial intelligence/big data ecosystem.

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Chemistry, Analytical*) / CiteScore - Q1 (*Engineering* (*miscellaneous*))
