

Trends in Development of Biosensors for Disease Diagnosis, Treatment, and Management

Guest Editor:

Dr. Amir Hatamie

Department of Chemistry and
Molecular Biology, University of
Gothenburg, 41296 Gothenburg,
Sweden

Deadline for manuscript
submissions:

closed (25 July 2023)

Message from the Guest Editor

In this Special Issue, we will focus on innovative and groundbreaking biosensing technologies, including electrochemical and optical biosensors, wearable technologies, paper-based detection strategies, microfluidic biosensors, gas sensors, nanopores, and micro–nano-scale sensors for single-cell analysis. Moreover, we pursue the significance of unique materials, nanomaterials, and sensor components such as aptamers, smart polymers, imprinted polymers, metamaterials, 2D and 3D nanomaterials, etc. Furthermore, we are interested in novel biomarkers, e.g., exosomes, microRNA, RNAs, and DNAs, in a variety of biological samples including tears, sweat, saliva, blood, urine, and even breath. Emerging results from these topics will provide the opportunity to better study and improve disease diagnosis and treatment processes, and will enable faster and higher diagnostic specificity.

Please visit the Instructions for Authors page before submitting a manuscript. Research articles, review articles as well as short communications are invited. For planned papers, a title and short abstract (about 100 words) can be sent to the Editorial Office for announcement on the website.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Chemistry, Analytical*) / CiteScore - Q1 (*Engineering (miscellaneous)*)
