Special Issue

Conjugated Polymers-Based Biosensors for Virus Detection

Message from the Guest Editor

As an alternative for current standard technologies, including RT-PCR, CT scans, enzyme-linked immunosorbent assays (ELISAs), and serological assays, biosensors are regarded as the next-generation diagnostic technologies for viruses due to their capability to detect various biological analytes, i.e., DNA/RNA, pathogens, and biomarkers. Conductive polymer-based biosensors are especially promising technologies due to their excellent sensitivity and selectivity to specific virus biomarkers and fast electrical signals. Therefore, we would like to invite you to contribute your work to this Special Issue which covers advancements in development of conductive polymer-based biosensors for detecting DNA/RNA or various biomarkers of viruses.

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza
Department of Chemistry "Ugo Schiff", University of Florence, Via della Lastruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
