

## Special Issue

# State-of-the-Art Biosensors in China (2nd Edition)

### Message from the Guest Editors

This Special Issue entitled “State-of-the-Art Biosensors in China (Volume II)” focuses on the most recent progress and innovations in the development of biosensors in China. Researchers from scientific fields of biology, chemistry, medicine, environment, engineering, and material sciences are invited to submit original and review articles that cover the following aspects:

- The monitoring and diagnosis of various diseases in biofluids, such as cancer biomarkers, infectious diseases, and heart-related conditions.
- The identification of pollutants and contaminants in environmental/food samples, such as pesticides, antibiotic residues, and heavy metals.
- The advancement of innovative biosensors, such as colorimetry, electrochemistry, fluorescence, luminescence, surface-enhanced resonance Raman scattering (SERS), nuclear magnetic resonance (NMR), nanomaterial-based, and aptamer/antibody-based sensors.
- The development of rapid and sensitive biosensing techniques in the bioanalysis and medical fields, such as microfluidic chips, single-molecule imaging, smartphone sensing, wearable devices, point-of-care systems, and machine and deep learning.

### Guest Editors

Prof. Dr. Chunyang Zhang

School of Chemistry and Chemical Engineering, Southeast University, Nanjing 211189, China

Prof. Dr. Nan Xiang

School of Mechanical Engineering, Southeast University, Nanjing 211189, China

### Deadline for manuscript submissions

31 January 2026

## About the Journal

### Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -  
Q1 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
