Topical Collection

3D-Printed Biosensors

Message from the Collection Editor

While inkjet printing has been applied as a surface functionalization process over the past decade, recent advances in structural, functional, and biological materials printing capabilities and processes provide new opportunities in biosensor design, fabrication, integration, and application. This Special Issue is dedicated to recent progress in 3D-printed biosensors. Original research articles reporting advances in 3Dprinted biosensor transduction elements such as electrodes and stimuli-responsive materials, 3D-printed biosensor-integrated microfluidic systems such as biosensor-integrated tissue and organ chips, 3D-printed hydrogel-based biosensors, and applications of 3Dprinted biosensors are encouraged. Related studies beyond these topics that report advances in 3D-printed biosensors and biosensing using 3D-printed platforms are encouraged. This topic is central to describing the emerging landscape of manufacturing processes for biosensor fabrication, specifically expanding the use of additive manufacturing processes for biosensor design, fabrication, and application.

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della Lastruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
