

Special Issue

Nanocomposite-Based Biosensors: Recent Advances and Perspectives

Message from the Guest Editors

Nanocomposite-based biosensors are promising for sensitive, selective, and rapid detection in various fields like healthcare, environment, and food safety. Integrating nanomaterials with biorecognition elements has transformed biosensing by enhancing device performance. This Special Issue aims to highlight recent advances in nanocomposite-based biosensors. Topics of interest for this Special Issue include, but are not limited to:

- Design and synthesis of novel nanocomposite materials for biosensing.
- Development of nanocomposite-based platforms for point-of-care diagnostics.
- Integration of nanocomposites with biofunctional molecules for enhanced biosensing.
- Fabrication and characterization of nanocomposite-based sensors.
- Challenges and future perspectives in nanocomposite-based biosensors.

Authors are invited to submit original research articles, reviews, and perspectives that address these topics. Submissions should present novel findings or approaches, demonstrating the potential impact of nanocomposite-based biosensors in advancing biosensing.

Guest Editors

Dr. Marco Aurélio Suller Garcia

Departamento de Química, Centro de Ciências Exatas e Tecnologias, Universidade Federal do Maranhão (UFMA), Av. dos Portugueses, 1966 Vila Bacanga, São Luís 65080-805, MA, Brazil

Dr. Andre Henrique Baraldi Dourado

Instituto de Química, Universidade Estadual Paulista, São Paulo, Brazil

Deadline for manuscript submissions

closed (29 February 2024)

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della
Lastruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -
Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
