

## Special Issue

# Microfluidic Systems for Single Cell Analysis

### Message from the Guest Editors

Up to now, microfluidic systems have dramatically facilitated the development of single-cell analysis by leveraging the micro-scale geometry for improving sensitivity, decreasing reaction time, decreasing reagents consumption, and improving parallelization and automation for high throughput. Microfluidic droplets offer extremely high scalability of reactions and straightforward single cell manipulation. Single-cell analysis techniques based on the microfluidics systems have become a powerful tool and a driving force for biological studies and discoveries. This growing field has increased the sensitivity, accuracy, and throughput of traditional single-cell analysis methods. For this Special Issue titled "Microfluidic Systems for Single-Cell Analysis", we welcome original works, perspectives, and reviews including but not limited to the developments and applications of single-cell analysis methods based on microfluidic systems, including single-cell capturing, sorting, culture, imaging, protein analysis, nucleic acid analysis, as well as genomics, transcriptomics, spatial transcriptomics, epigenomics, and multi-omics analyses.

## About the Journal

### Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -  
Q1 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
