Feature Paper in Biosensor and Bioelectronic Devices 2024

Message from the Guest Editor

This Special Issue, entitled “[Feature Paper in Biosensor and Bioelectronic Devices 2024](#)”, represents an expanding disciplinary field that combines biosensors with various emerging technologies. This Special Issue’s scope includes, but is not limited to, the design, development, and application of biosensors (enzyme sensors, immunosensors, DNA/RNA sensors, etc.) and bioelectronic devices (electronic nose, electronic tongue, implantable electronics, etc.) in the biological, medical, environmental and industrial fields, with an emphasis on matters of worldwide interest.

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -
Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
