New Advances in Bioimaging and Biosensing Based on Nanomaterials

Message from the Guest Editor

In recent decades, nanomaterials have been developed for different applications, particularly in the fields of biosensing and bioimaging. To understand the biological processes and mechanisms of diseases, novel probes for monitoring important biomarkers and the biological environment can be achieved through bioimaging. Furthermore, the development of biosensors can significantly contribute to disease diagnosis, detection of biomarkers, environmental monitoring, food safety, etc. Different types of nanoprobcs, from 0-dimensional nanodots and 1-dimensional nanowires to 2-dimensional nanosheets and 3-dimensional nanostructures, have been widely used for biosensing and bioimaging, based on their optical, electrochemical, and magnetic properties. In this Special Issue, we invite authors to submit original research articles and comprehensive reviews in the field of biosensing and bioimaging based on nanomaterials.

Guest Editor

Dr. Steven Xu Wu

Department of Chemistry, University of South Dakota, Vermillion, SD 57069, USA

Deadline for manuscript submissions

28 February 2026

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della
Lastruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -
Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
